✚ Output

Soal 1

Kania Meliana - 21091397028

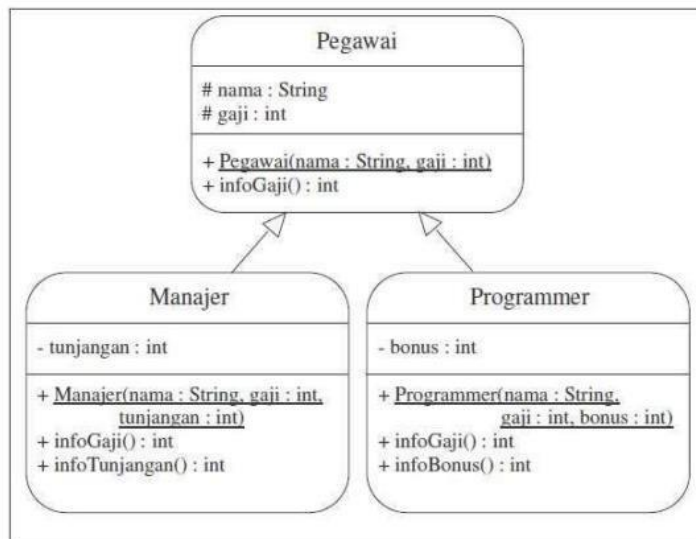

Nama manajer: Ica
Tunjangan: Rp. 8000000

Nama kurir: Liana
Gaji: Rp. 6500000

✚ Analisa

Pada kasus yang terdapat pada soal diatas implementasi dari polymorphic argument berada di class info dimana method info dibuat static agar pemanggilannya tidak memerlukan diinisiasi, sehingga bisa langsung dimasukkan menjadi parameter pada method info di class info.

2. Buatlah program berdasarkan UML berikut

Analisa

Program diatas adalah penerapan inheritance dengan konsep overriding, dimana pemanggilan construct di masing-masing class turunan hanya akan menginisiasi properti yang dimiliki dengan visibilitas private dan properti lain yang diturunkan akan langsung diinisiasi dengan construct dari parentnya
